## Re-Grip

August 9, 2017

Re-Grip

<http://re-grip.com/>

Tools

Re-Grip is a multipurpose grip that can be placed on everything from wheelbarrows, spades and shovels to bike handles and fishing poles. It's an affordable solution for placing or replacing worn-out handle grips on a variety of tools, levers and handles. It's used by sliding it onto the tool and pulling the tab to unwind the inner coil. The elastic grip will then constrict and form snugly around the handle.
